

UV Stabilization

Re: M-Cast Acrylic

To Whom It May Concern:

A&C Plastics hereby certifies that the M-Cast Acrylic Sheet is processed with monomer that is UV stable and can be used for interior and exterior applications. Years of anecdotal evidence support this cell cast acrylic as a very good material for signage, aquariums, construction applications, windows and general use.

Should you need any other information, please feel free to reach out to your sales representative.

Sincerely,

A&C Plastics
